Full Stack Web Developer

One year into my development / coding journey. I've always focused primarily on front-end technologies but have begun to explore back-end technologies. I'm constantly teaching myself, I truly believe that self-teaching can be incredibly efficient. I am working on several projects at the moment, always putting myself out of my comfort zone so I can become a better developer.

Skills

- ❑ HTML
- ❑ CSS
- ❑ Javascript / React.js
- ❑ Node.js
- ❑ Express.js
- ❑ Materialize
